- Feb 27 How to Use an AI

AI Overview

Should I Worry?

A friendly, non-technical talk
for our retirement community

Quick History of Artificial Intelligence

AI did not appear overnight.

It has been developing slowly
for over 70 years.

1950s–1970s: Early Ideas

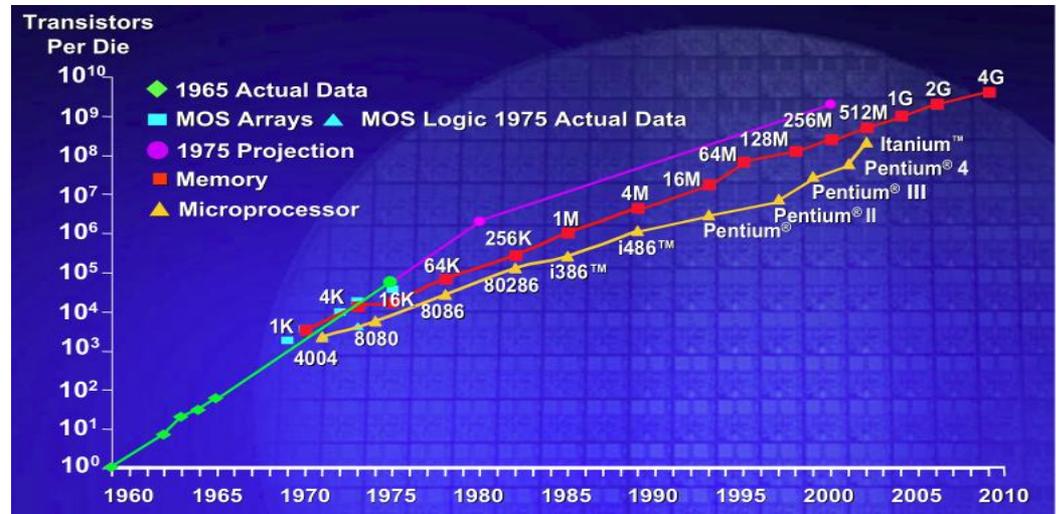

Scientists wondered: “Can machines think?”

But early computers were very limited.

1980s–2000s: Smarter Computers

Computers became faster. Moore's law

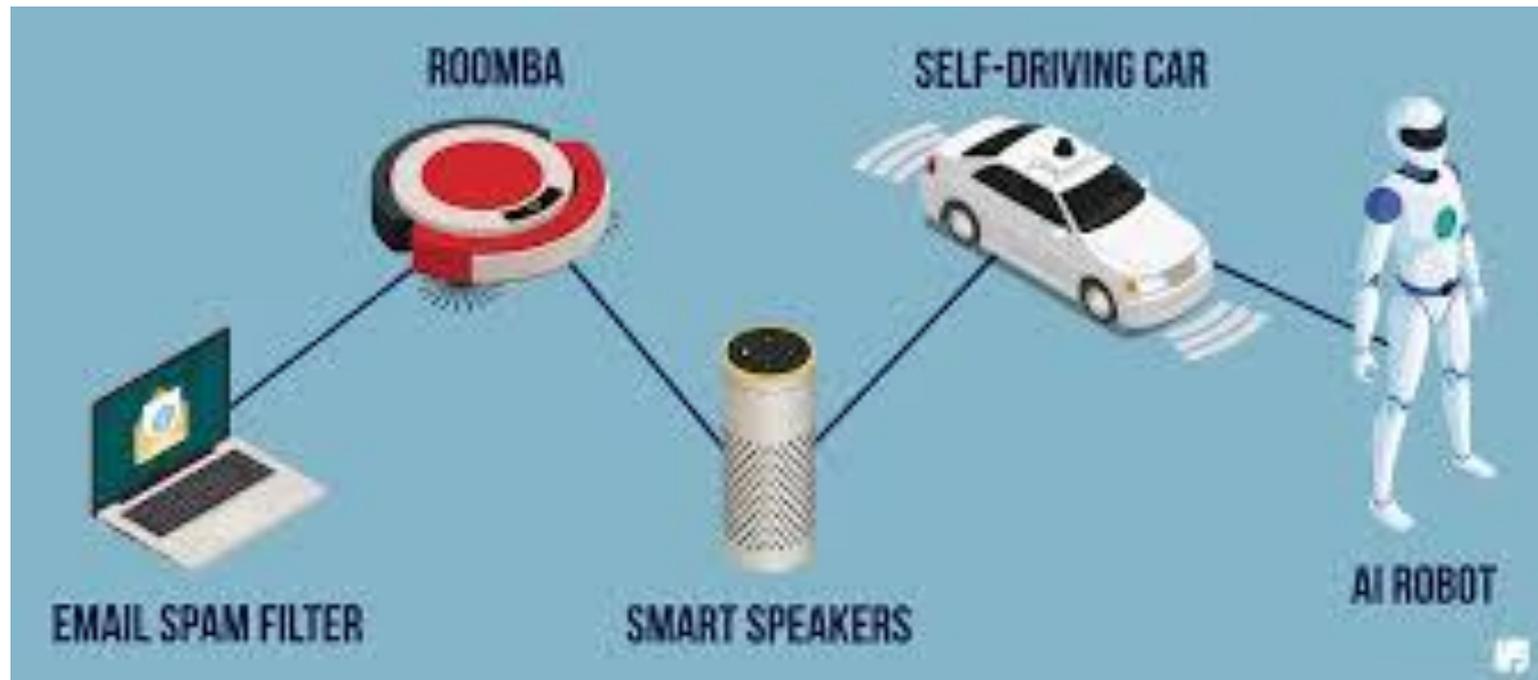

They could recognize patterns and follow rules better.

2010s–Today: AI in Everyday Life

Better computers + more data

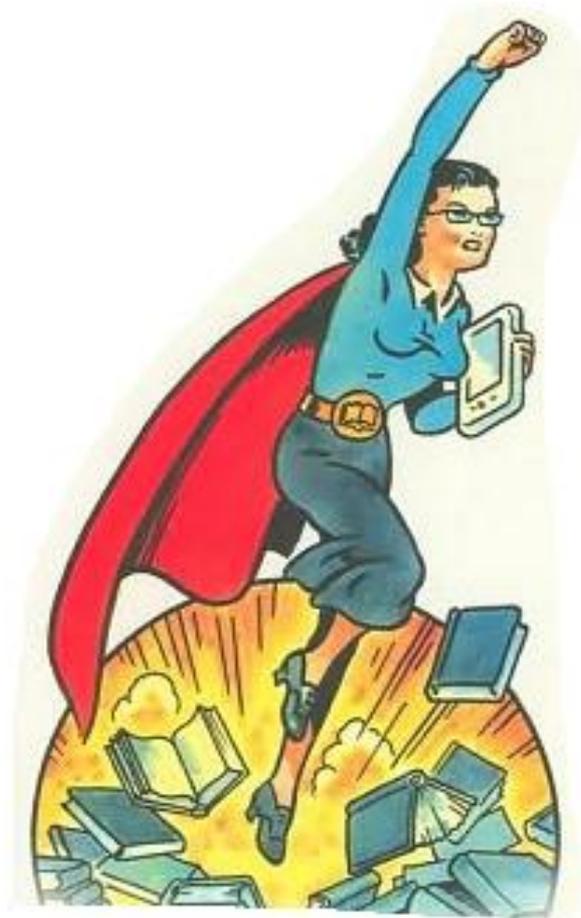

AI moved into phones, cars, and homes.

What Is AI? (Plain English)

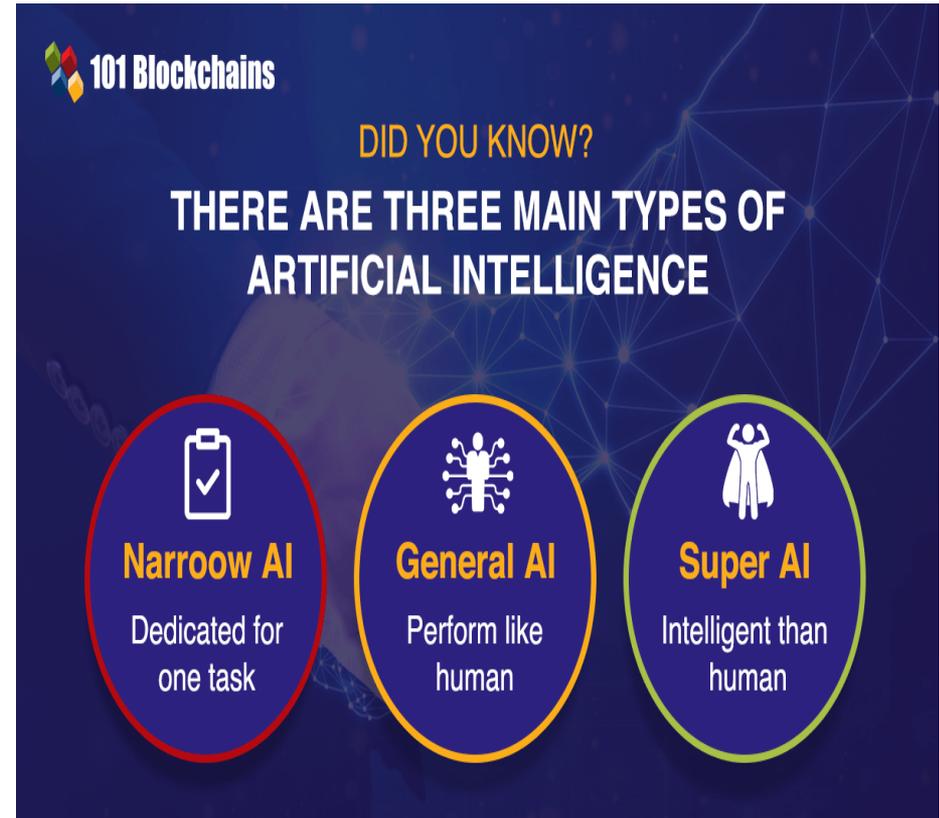

AI is computer software that helps machines do helpful tasks.

- It follows instructions
- It does not think or feel

Types of AI

- Narrow or Weak AI
 - Trained for a specific purpose
- Augmented AI
 - Generative AI
- Generalized AI
 - Computers we see in movies
 - Self-aware

Why is Generative AI a “Big Deal”

How does google work?

how does google work **book**

how does google work **so fast**

how does google work **out popular times**

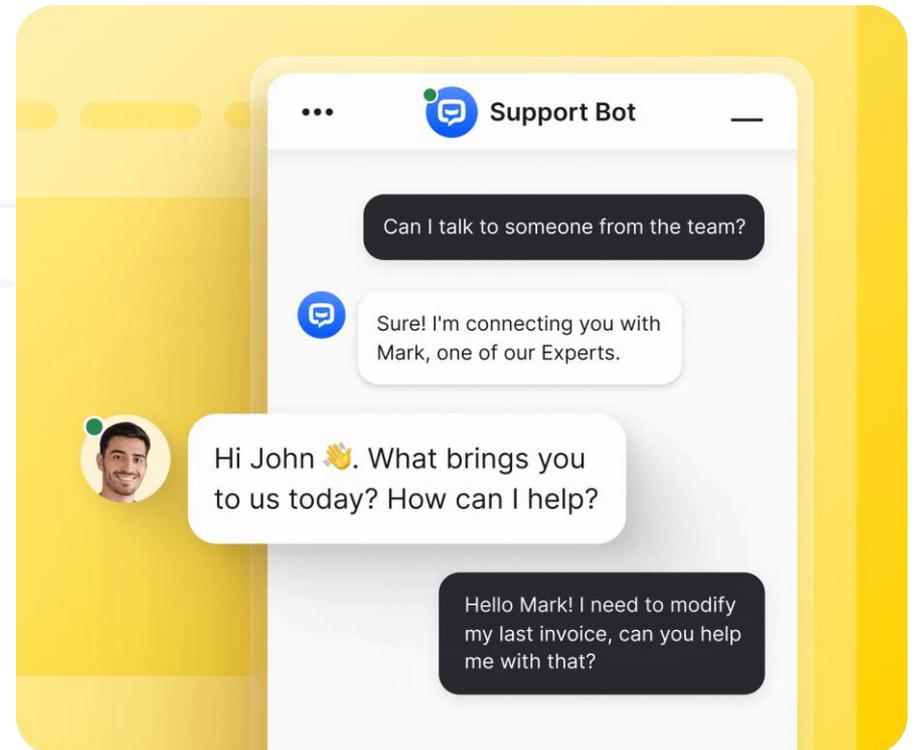

how does google work **ppt**

how does google work **in hindi**

how does google work **wikipedia**

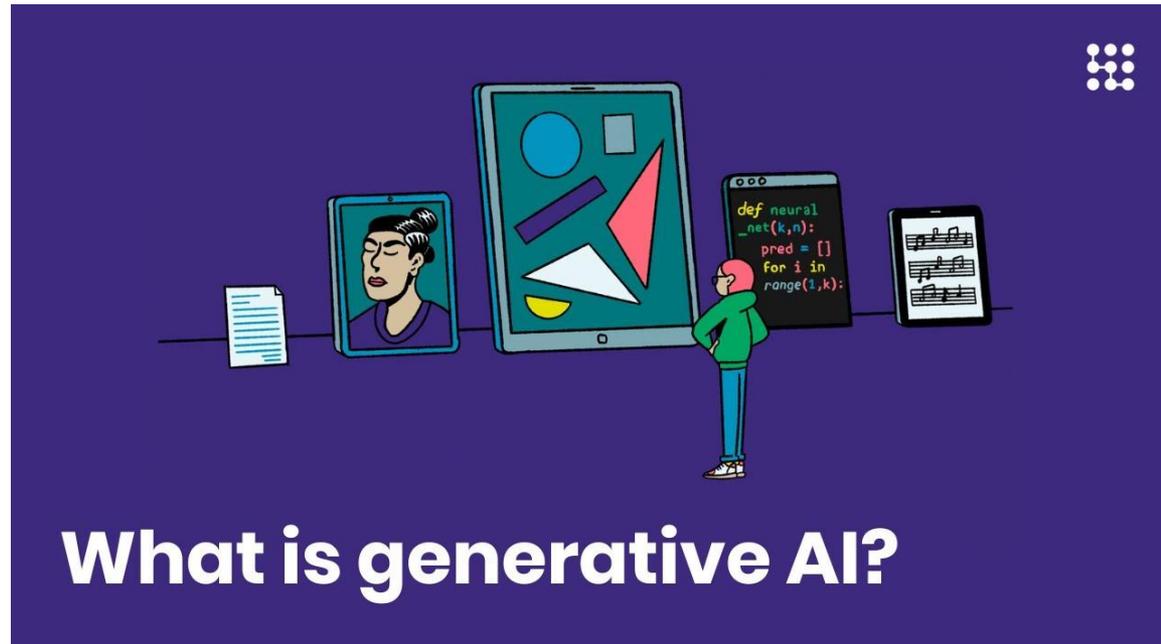

how does google work **out traffic**

how does google work **technically**

Generative AI

- Step up from Search Engines
- Generates content that didn't exist before
- Images from description
- Music from description

What AI Is NOT

- Not alive
- No emotions
- No opinions
- No intentions

You Already Use AI

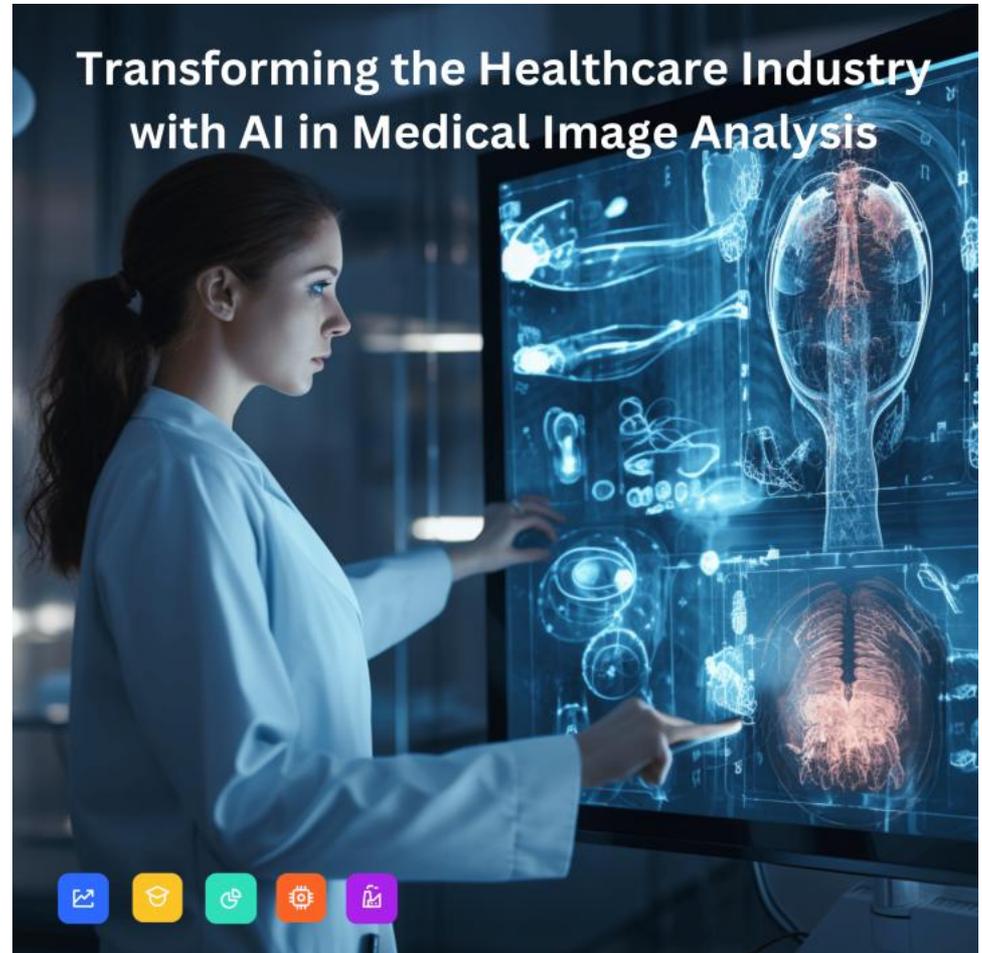

- Phone voice assistants
- Email spam filters
- Traffic jams and directions
- Photo albums

The Good Stuff

How AI Can Help You

- Medication reminders
- Fall alerts
- Voice control
- Health analysis

The Good Stuff

How AI Can Help You – Part 2

Personal Creativity
Restore Legacy

Using a Chatbot AI

- Be specific about topic or issue
- Ask open ended question
- Avoid complex sentence structures

Personal Example of Creativity

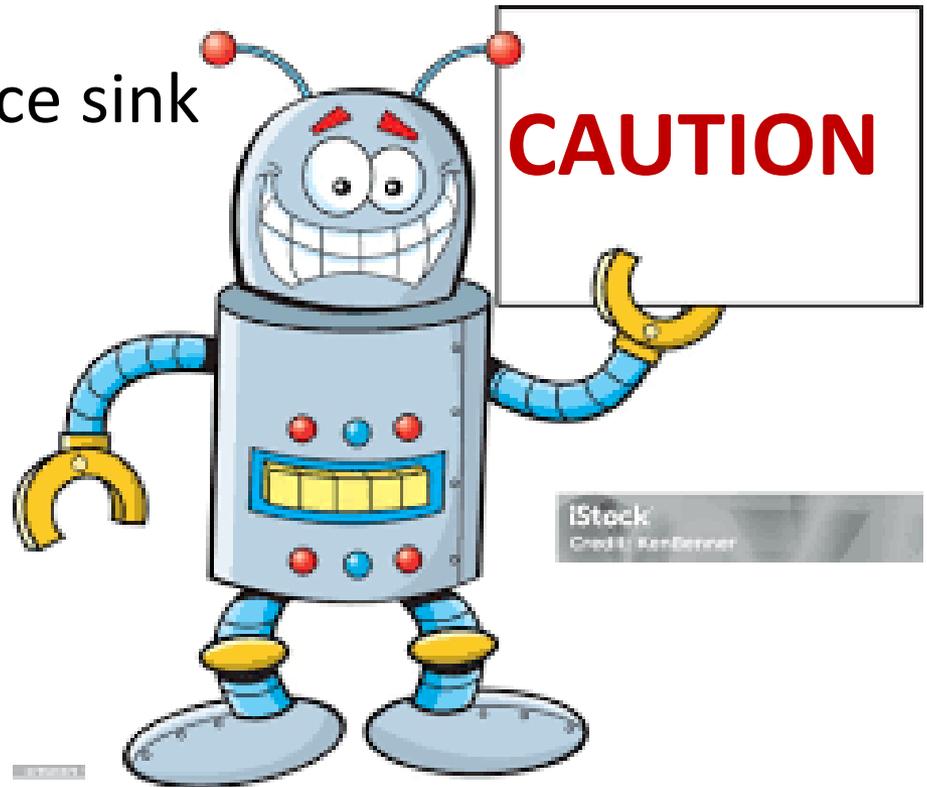

[Song link](#)

Should I Worry About AI? - Part 1

The "Hype"

- Will robots take over?
- AI's Hallucinate
- Data Centers = Resource sink

Should I Worry About AI – Part 2

Scams and Safety

- Scams
- Privacy

Staying Safe with AI

- Pause before responding
- Verify
- Don't Overshare
- Stay Curious

The Big Picture

AI is a tool — like electricity or the internet.

People are still in control.

Questions & Conversation

There are no silly questions.

Let's talk.
