

Getting LOCAL STATIONS on your DIRECTV box (Gemini) when away from Venture Out (by Alex Youg, VO Eclub Tech Director)

Here's what DirecTV told me that worked. I brought my DirecTV Gemini boxes back home to Calif but was initially unable to get my local TV stations. The box kept showing the AZ stations. Here is what worked for me:

- (1) Press "Home" on your remote
- (2) Go to "Settings"
- (3) Go to "System"
- (4) Select "Device Preferences"
- (5) Select "Location"
- (6) Change "Location status" to "Use Wi-Fi to estimate location"
- (7) Press "Home" on your remote
- (8) On the side of your DirecTV box, you will see a tiny RED button. Press it for 3 seconds to "soft reset" your box.
- (9) Hopefully, your system will now display your Local Stations
- (10) For some systems, you will need to repeat steps (6) to (8), turning Wi-Fi location off and on, to make your local stations show up.

As I said, this worked for me. Your mileage may vary.
